Professional Summary

Software Engineer with 3 internships and 5+ projects specializing in MERN Stack, React, JavaScript, AWS, and Network Security. Developed scalable full-stack applications, engineered 12+ RESTful APIs, and delivered AI-powered and cloud-based solutions while maintaining an 8.48 CGPA.

Education

Bengal College of Engineering and Technology July 2020 - June 2024

Bachelor of Technology (B. Tech), Computer Science Engineering

- CGPA: 8.48/10.0
- Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Machine Learning, Software Engineering

Skills

- Programming Languages:** JavaScript (ES6+), TypeScript, Python
- Frontend Technologies:** React, Redux, React Router, Axios, React Hook Form, HTML5, CSS3, Tailwind CSS
- Backend Technologies:** Node.js, Express.js, RESTful APIs, Mongoose, MVC Architecture, Middleware Design
- Database & Cloud:** MongoDB, Amazon Web Services (AWS, EC2)
- Authentication & Security:** JSON Web Tokens (JWT), Bcrypt.js, Cross-Origin Resource Sharing (CORS)
- API Testing:** Postman (GET, POST, PUT, DELETE requests), API Testing, Request Validation, Response Handling
- Version Control:** Git, GitHub
- Deployment & Hosting:** Vercel, Render, Netlify
- Developer Tools:** Visual Studio Code, MongoDB Compass, Postman, npm, PowerShell
- Software Engineering Practices:** API Design, Error Handling, Debugging, Code Optimization, Root Cause Analysis (RCA)

Experience

Code Alpha June 2024 - September 2024

Software Engineering Intern

- Optimized React applications using 8+ hooks and performance techniques, reducing unnecessary re-renders.
- Leveraged AI-assisted development workflows and AWS services, accelerating feature implementation across 5+ projects.

Bharat Intern June 2024 - July 2024

Full Stack Development Intern

- Developed 3 MERN CRUD applications, enabling seamless data management across frontend and backend systems.
- Engineered 5+ RESTful APIs with MongoDB integration, enhancing data reliability and application scalability.

Code Clause June 2023 - July 2023

Web Development Intern

- Designed 4 responsive websites using HTML, CSS, and JavaScript, enhancing UI consistency and usability.
- Implemented 20+ advanced HTML/CSS techniques, improving maintainability and accelerating frontend development.

Projects

React Hooks Utility Package April 2026 – June 2026

Technologies: React, TypeScript, Node.js, Testing Library, GitHub Action, JSDOM, npm

- Created a React hooks library with 5 reusable hooks, reducing repetitive UI logic across modern applications.
- Built 4 unit-tested custom hooks utilities, improving code reusability and accelerating frontend development.

AI Powered Spam Mail Classification January 2026 – March 2026

Technologies: React, Node.js, Express, MongoDB, Gmail API, OAuth2, Tailwind CSS

- Crafted an AI-powered spam email classifier achieving 94% accuracy through NLP-driven email classification.
- Optimized 3 machine learning models, improving spam detection accuracy and minimizing false positive predictions.

Real-Time Network Discovery & Security Tool January 2025 – April 2025

Technologies: Bash Scripting, NMAP, Linux

- Constructed a Bash-based network scanning toolkit with 12 security modules for comprehensive network analysis.
- Automated vulnerability detection and HTML reporting across 6 service categories, accelerating security assessments.

Certifications

- TypeScript:** Assessed on type safety, generics, interfaces, utility types, and advanced type system concepts April 2025
- Docker Training:** Completed hands-on training on Docker CLI, containerization, volumes, and networking February 2025
- JavaScript:** Assessed on advanced JavaScript, algorithms, REST API, Object-Oriented Programming (OOP) February 2025
- Python Programming:** Assessed on DSA, OOP, problem-solving, and core Python concepts October 2023
- AWS Cloud Practitioner:** Gained proficiency in EC2, IAM, S3, billing models, and cloud fundamentals July 2023

Achievements

- Delivered 5+ projects spanning MERN, AI, cloud, and network security technologies.
- Progressed from web development to full-stack and software engineering roles across 3 internships in 15 months.
- Delivered 12+ APIs and reusable software components, strengthening application scalability and maintainability.
- Achieved 94% classification accuracy in an AI-powered spam detection system using machine learning.
- Architected a network security toolkit featuring 12 scanning modules and automated vulnerability reporting.
- Maintained an 8.48 CGPA while gaining industry experience through 3 professional internships.
